

# AREAS TO IMPROVE EFFICIENCY

in Empower CDS

Where time is lost – and how to improve it

# LACK OF CONFIDENCE IN EMPOWER

Analysts (especially new users):

- don't fully understand system structure and logic
- search for functions and buttons
- have fear of making mistakes

---

Often this is:

- lack of experience
- or missing structured training

# LACK OF CONFIDENCE IN EMPOWER

Let analysts **train in a test project:**

- no risk of doing something wrong
- freedom to explore functions
- better understanding of the system

---

Provide training based on **your actual workflows**

# UNCLEAR PROCESSING WORKFLOWS

Analysts often don't know:

- how to review raw data efficiently
- how to set integration parameters
- which steps are really necessary

---

Result:

- too many manual steps
- inconsistent processing

# UNCLEAR PROCESSING WORKFLOWS

Define a **structured processing workflow**:

- clear step-by-step approach
- consistent use of processing methods
- use the full potential of Empower

# 3 UNSTRUCTURED DATA REVIEW

Common issues:

- no clear review workflow
- too much or too little review
- important information not visible

---

Result:

- risk of missing errors
- or spending too much time

# 3 UNSTRUCTURED DATA REVIEW

Define a **structured data review workflow**:

- step-by-step review process
- focus on relevant parameters
- risk-based approach
- electronic review within Empower (not in report)

# SMALL INEFFICIENCIES = BIG TIME LOSS

**Clear workflows and confident users**  
make a significant difference in:

- efficiency
- data quality
- GMP compliance

# Want to improve efficiency of your Empower workflows?

Book a free **25-min Workflow Review**

- Discuss your current processes
- Identify inefficiencies
- Get practical recommendations
